

A woman with her hair in a ponytail, wearing a brown sweater, is sitting on a couch in a dimly lit room. She is holding a remote control and looking at a large television. The TV screen displays a grid of various video thumbnails. A lamp is visible on a table next to the TV.

The Global TV Deck

Total TV's consumption across the world

The Global TV Deck 2024

1. Austria
2. Belgium
3. Canada
4. Denmark
5. France
6. Germany
7. Italy
8. Japan
9. Netherlands
10. Norway
11. Poland
12. Spain
13. Sweden
14. Switzerland
15. United Kingdom
16. United States

This compelling – perhaps counter-intuitive – new data on video consumption from 16 countries has been collected by egta and the Global TV Group. It demonstrates the continued popularity, presence, and power of TV around the world.

Although, thanks to digitization, today's TV can be watched in many ways – be it broadcast or streamed, live or on demand – its digital transformation has done nothing to diminish its ability to captivate attention.

In fact, TV's digital expansion is making it even stronger, even more compelling for both viewers and advertisers, with new technologies enabling TV companies to continue breaking new creative and commercial ground.

Austria: Multiplatform TV accounts for 77% of video consumption

Viewing on all devices

Netflix: 4,5%
Disney+: 1,0%
Prime: 2,0%

Netflix: 10,6%

Norway: Multiplatform TV accounts for 75% of video consumption

Viewing on all devices

Average video time per day :

- **10-79 yo:**
136 minutes
- **10-19 yo:**
67 minutes

Kantar TVOV: BVOD is only for the TV companies NRK, TV 2, and Warner Bros. Discovery (BVOD). BVOD is only VOD, and "live online" is coded as linear. Official viewing figures consist of live TV viewing +7 (recordings and weekly archives), and video on demand (BVOD live). SVOD: Netflix, YouTube, Disney+, HBO Max, Prime Video (in home).

Netflix, HBO Max, Viaplay, Disney+, and Amazon Prime are measured using a different method in TVOV. These are comparable with each other but not directly with NRK TV, TV 2 Play, and Discovery+. The viewer numbers reported for the aforementioned services are lower than the actual numbers due to the lack of measurement of viewing outside households and are more uncertain because the figures are not adjusted for traffic data.
